- GitHub

SKILLS

- C# 12
- .NET 8 / ASP.NET Core
- Entity Framework Core 8
- SQL Server & T-SQL
- Clean Architecture & CQRS
- Domain-Driven Design
- Event-Driven Architecture
- RabbitMQ & MassTransit
- MongoDB, Redis, Elasticsearch
- S3
- Hangfire & Polly
- Docker & Azure DevOps
- TDD, xUnit, Moq
- SignalR & FluentValidation
- HTML, CSS, SASS, JS, React

EDUCATION

ISLAMIC AZAD UNIVERSITY
Bachelor of IT Software Engineering

LANGUAGES

Persian (Native)

English (Professional)

PROFILE

Energetic and results-driven Senior .NET Developer with 6 years of experience in architecting and developing high-scale, event-driven backend systems. Expert in Clean Architecture, CQRS, and Domain-Driven Design (DDD), with a strong focus on performance optimization and Test-Driven Development (TDD). Proven track record of managing complex enterprise solutions.

WORK EXPERIENCE

- **Flytoday** 2024 - Present
  Senior Developer
  - Lead backend engineer for a comprehensive B2B/B2C hotel-contracting and accommodation-distribution platform (hotel onboarding, contracts, rates, booking engine, partner distribution API, wallets, and guest-host chat).
  - Architected and developed a highly scalable system using .NET 8, C# 12, and Clean Architecture principles.
  - Implemented CQRS with a custom mediator, separating read/write concerns.
  - Designed event-driven workflows using RabbitMQ, MassTransit, and a custom Transactional Outbox pattern.
  - Engineered a scalable polyglot persistence layer using SQL Server, MongoDB, Redis, and Elasticsearch for analytics and caching.
  - Maintained high code quality via Test-Driven Development (TDD).
  - Managed CI/CD pipelines on Azure DevOps, containerizing services with Docker and deploying via Harbor registry.
  - Enforced strict security protocols (JWT, RBAC, OWASP Top 10) and utilized AI-assisted development tools to optimize team workflows.

- **DanaPardaz** 2023 - 2024
  Full Stack Developer
  - Developed and optimized full-stack .NET applications, writing clean and efficient code while reviewing and updating existing applications for functionality and performance.
  - Utilized SQL Server extensively as the primary database, implementing stored procedures (SP), scheduled tasks, and triggers to optimize data operations and ensure seamless data flow.

- **Webone** 2021 - 2022
  .NET Backend Developer
  - Played a key role in the digital development of companies by designing and implementing over 30 diverse websites.
  - Focused on grasping foundational concepts of SQL Server database automation (SPs, triggers, jobs) to optimize queries and enhance system efficiency.

- **Spad** 2020 - 2021
  Frontend & FullStack Developer
  - Worked as a Frontend Developer using HTML, CSS, and JavaScript for 6 months, transitioning to Backend development for 8 months with C# and ASP.NET MVC/Core.
  - Contributed to a dedicated management panel (ASP.NET Core) implemented by the internal team (frontend and backend).
